

# COVID-19 Safety Protocols

## In-person Events

The health and safety of our supporters is at the forefront as WICT returns to in-person events. To lower the risk of spreading germs, until further notice, WICT is requiring proof of COVID-19 vaccination or proof of a negative COVID-19 test for admittance to in-person events, in addition to whatever the venue requires.

Program participants must be at least two weeks out from the second shot of a two-dose series, or two weeks out from the single dose Johnson & Johnson vaccine. Alternatively, participants may show proof of a negative COVID-19 test (PCR or Antigen), with the test administered by a medical professional within 72 hours of the start of the event. This policy is based on guidance and recommendations issued by the federal Centers for Disease Control and Prevention (CDC) and other public health authorities.

Extending to all in-person events until further notice, registrants will be required to provide proof of COVID-19 vaccination or a negative COVID-19 test on-site before entering the meeting space. WICT will continue to require attendees to submit a COVID Acknowledgement Form (please reference program webpage for correct form) prior to the start of the event, and to comply with any state, local or WICT required mask mandates in place for indoor or outdoor events.

### **Digital Vaccination Record Options**

Experts recommend taking a digital photograph of both sides of your personal vaccination record card. That photo can be stored in the photos area of your smartphone and be accessible wherever you need it. Below are some “app-based” alternatives to show proof of vaccination.

1. If you are a user of the Clear platform for TSA Pre-Check, Clear now offers the option of creating a digital vaccine card. It's secure, easy and takes just minutes. [Learn more.](#)

2. VaccineCheck®, 100% User-Authorized Vaccine Verification & Digital Card Issuance, makes it easy for individuals to present their health status digitally, while maintaining privacy and security. Powered by Pinpoint and backed by over 30 years of Enterprise Compliance Technology and Safety experience, VaccineCheck® generates an authenticated digital version of a CDC vaccine card after verifying COVID-19 vaccine history. [Learn more.](#)

This new policy is designed to create a safe and enjoyable experience for all participants. We thank you for your understanding and cooperation and look forward to returning to live events.
